OUR COMPANY

STYLCASA is highly committed to delivering high-quality products and processes, investing both on the relationship Company - Customer and Company - Supplier in order to ensure maximum stability, fairness and consistency in relations with customers, suppliers and partners alike.

The same commitment is also pursued in products quality: they are environmentally friendly and biocompatible.

We also adopt low environmental impact materials and natural origin raw materials to accomplish the best outcome and fulfil all the customer requirements, enhancing design and harmony of forms, pursuing the respect of both human needs and the environment.

Our high degree of specialization is perfectly entwined with the most effective versatility, in order to expand our range of activity to the whole interior design scenario.

Thoroughness is not only aesthetics

Stylcasa has adopted a modern approach in construction area, paying a special attention to biocompatible and eco-friendly solutions in addition to energy saving methods.

Our mission has always been focused on promoting the use of natural origin raw materials, thanks to our futurist mindset and attention for research and innovation.

In this view Stlycasa builds and renovates using an innovative system in order to easily compose working spaces.

Thanks to this approach a high-performance architecture and high aesthetic quality can be achieved, satisfying the most demanding designers and then creating bespoke environment without constraints.

Crucial moments: when thoroughness and functionality in work environment are vital.

The use of innovative systems, a vast knowledge of the construction industry and the great care in details for interiors, have allowed us to become a leader in the renovation of healthcare facilities.

Our aim is to creating more and more efficient environments and long lasting performances.

Our expertise in architecture for well-being and health

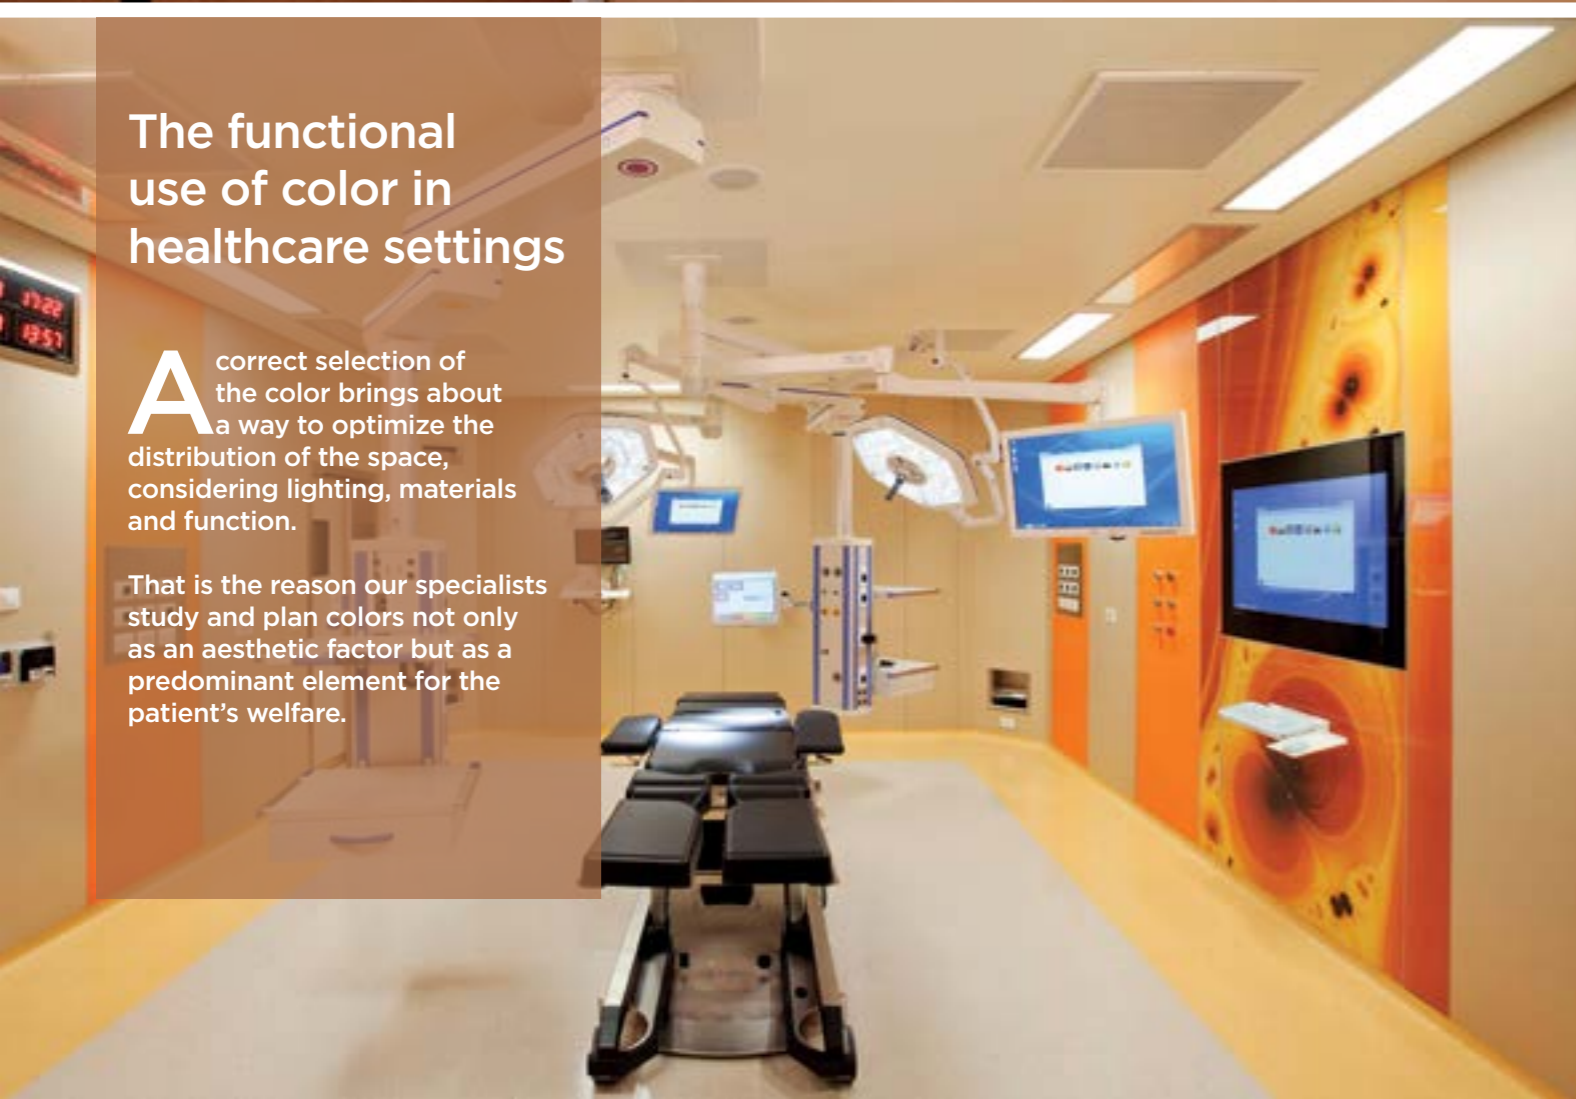

Stylcasa has been in the construction industry for over 30 years, building healthcare and education facilities, hotels and homes.

Our main goal has dependably been centered around advancing the utilization of natural origin raw materials, in virtue of our cutting edge outlook and consideration for research and advancement.

In this view Stylcasa manufactures and redesigns great works utilizing an inventive framework with a specific end goal to effectively make working spaces. Because of this approach a high-performance architecture and high aesthetic quality can be accomplished, fulfilling the most requesting planners and afterward making bespoke environment without limitations.

The functional use of color in healthcare settings

A correct selection of the color brings about a way to optimize the distribution of the space, considering lighting, materials and function.

That is the reason our specialists study and plan colors not only as an aesthetic factor but as a predominant element for the patient's welfare.

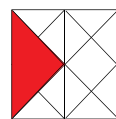

EDUCATION

We pay the same attention in any project and great work, from healthcare to education facilities.
